

DutchFarm

INTERNATIONAL

Backed by more than 60 years of experience in development and production and 30 years in global registration and marketing, Dutch Farm International BV is your reliable partner in high-quality products for the animal production industry.

Dutch Farm International's products are available in more than 50 countries worldwide, under four brandnames: DutchFarm (veterinary pharmaceuticals and nutraceuticals), DufaMix (premixes, concentrates and additives), DufaSept (detergents and disinfectants) and DufaFeed (prestarter, compound and complimentary feed).

Dutch Farm International stands for premium quality products, for effective pharmaceuticals, essential nutrients, farm hygiene and food safety, because we want your animals to be healthy, strong and productive. We do it all, every day...

DufaMix

DufaMix products are manufactured in EU GMP+ licensed facilities, using modern automated equipment, comprehensive track and trace systems, feed safety programs and NIR analysis at each bunker filling point. We fully comply with the highest quality assurance standards for animal feed production. Our entire staff is focussed on quality, with on-going training programs to continuously maintain and further develop this aspect.

Only premium-grade ingredients are included in our DufaMix products. These are sourced solely in Western Europe from carefully selected preferred suppliers of raw materials. The whole chain is GMP+ certified, from raw material up to finished product.

Custom formulations

We have developed a range of DufaMix premixes, concentrates and feed additives with balanced compositions for all stages and indications of animal production. Supported by our team of nutritionists, we are also able to supply you with custom formulations which can be tailor made to the nutritional needs of your animals. We can also provide technical assistance with your feed formulations to make sure that you produce the best quality feeds at an affordable price, using our high quality premixes, concentrates and feed additives!

As will be evident: we never compromise on quality!

Premixes, Concentrates and Feed Additives

DufaSept

DufaMix

DufaFeed

All for animals!

DufaMix Allround

DufaMix Allround is the name of our most versatile range of feed premixes.

- Available for poultry, cattle, goats, pigs and sheep.
- Contains balanced amounts of vitamins, minerals, amino acids and trace elements.
- For all production stages the same premix, simply adjust the inclusion rate per stage. Easy to use.

DufaMix Allround is added to the formulated diet, to meet the requirements for optimal production, fertility, feed conversion, litter size and growth potential. It will help you achieve the best possible results in the most easy and cost-effective way.

DufaMix Broiler program

Broilers have different feed requirements in terms of energy, proteins and minerals during different stages of their growth. Young broilers have a high protein requirement for the development of muscles, feathers, etc. As the broilers grow their energy requirements for the deposit of fat increase and their protein requirements decrease. It is important to adapt feed rations to these requirements for best results and maximum production outcome.

Enzymes are included for improved feed conversion, digestion and the reduction of wet droppings. An anticoccidial is included in the starter and grower premix to prevent coccidiosis in broilers.

- **DufaMix Broiler Starter Premix 2,5%**
Formulated to establish a good appetite and achieve maximum early growth.

- **DufaMix Broiler Grower Premix 2,5%**
Focused on optimal performance and to allow the bird to express its full meat yield potential.
- **DufaMix Broiler Finisher Premix 2,5%**
Changes in body composition can be rapid during the finishing period and excessive fat deposition and loss of breast meat yield need to be carefully considered.
- **DufaMix Broiler Concentrates 5% - 35%**
Essential ingredients mixed with high protein sources, ensuring farmers to produce high quality feeds and achieve the best possible results. Available in 5%, 10% and 35%.

DufaMix Layer program

These premixes and concentrates contain a balanced blend of high potency vitamins, minerals and trace elements, promoting optimal performance and providing support in times of stress and disease challenges. Enzymes are included for improved feed conversion, digestion and the reduction of wet droppings.

- **DufaMix Rearing Hens Premix 2,5% (0-17 weeks)**
Formulated for a good development of internal organs and a good body physique to prepare your layers for their laying period.
- **DufaMix Laying Hens Premix 2,5% (>17 weeks)**
To support your layers during production, to keep them healthy en to ensure best laying results. Optionally, carotenoids can be added to customer yolk fan colour specifications.
- **DufaMix Layer Concentrates 5% - 20%**
High quality premix mixed with highly digestible proteins, formulated to increase laying percentages and optimizing egg size and quality. Available in 5%, 10% and 20%.

DufaMix Cattle program

For cattle we have developed a range of premixes to ensure best growth and full meat yield potential for beef cattle and for increased milk production for dairy cows. These cattle premixes can be used in production of cattle feeds or as top dressing. Ask your supplier for more details and possibilities!

Mycotoxin binders

Worldwide, mycotoxins are a serious challenge for farmers. Mycotoxins are unpredictable and hard to control. About 25% of world's grain production is contaminated with mycotoxins. Protect your animals against the effects of these toxins!

DufaMix Tox-Bind

- Affordable and effective mycotoxin binder, which will tightly bind and immobilize toxins in the gastrointestinal tract.
- Composed of Bentonite-montmorillonite clay, selected yeast cultures and yeast cell extract.
- Stable over a wide pH range, essential for the absorption of multiple types of mycotoxins.

Acidifiers

Acidifiers improve pancreatic secretions that increase nutrient digestibility. While it inhibits the development of pathogenic microbes, it reduces the number of potentially harmful bacteria and promotes beneficial growth.

DufaMix Acid-Performance

- Acidifier to help safeguard your animals against the detrimental effects of microbes, while at the same time increasing feed conversion.
- Composed of a mixture of highly active organic acids (calcium formiate, calcium propionate, fumaric acid, calcium lactate) and mycotoxin binder (clinoptilolite of sedimentary origin), all in one.
