

ANTI-MOULD

Analytical constituents:

88.2%	Crude ash	10.0 %.....	Calcium	0.0 g/kg	Lysine
0.0 %	Crude fibre	0.21 %.....	Magnesium	0.0 g/kg	Methionine
0.0 %	Crude protein	0.08 %.....	Sodium	0.0 g/kg	Threonine
0.0 %	Crude fat	0.0 %	Phosphorus	0.0 g/kg	Tryptophan

Composition:

Additives (per kg)

Technological additives

Binders: 515 g Clinoptilolite of sedimentary origin (1g568); 50 g Bentonite-montmorillonite (1m558i)

Preservatives: 312.5 g Calcium propionate (E282); 75 g Calcium formiate (E238); 15 g Fumaric acid (1a297); 12.5 g Calcium lactate (E327); 5 g Sorbic acid (E200); 5 g Citric acid (E330)

Anti-caking agent: 10 g Colloidal silica (E551b)

Description:

DufaMix Anti-Mould can be added to livestock feed to reduce accumulation of bacteria, yeasts and fungi. These contaminants thrive in warm and humid environments, and will negatively affect feed palatability, digestibility and energy content. DufaMix Anti-Mould, with its powerful antimicrobial properties, significantly improves nutrient intake, weight gains and production thus improving animal performance.

Inclusion rate:

This premixture may be incorporated in feed for all species and categories of animals.

The recommended rates of inclusion are:

Moisture content < 12% 0.5 – 2 kg per tonne in the final feed

Moisture content ≥ 12% 3 – 4 kg per tonne in the final feed

Storage conditions:

Store dark and dry below 25°C. Do not freeze.

Packing:

25 kg sacks.
